The bond between a parent and a child is impossible to describe in a few sentences. In this book, though, William J. McGee conveys the rapport between a father and his young son by relating their thoughts, words, hopes, fears, and activities over four summers. In a remarkable way, they teach each other the meaning of trust and love.

—Dr. WILLIAM BERNET, President, Parental Alienation Study Group

HALF THE CHILD is an amazing account of what it is like to be an alienated parent and to have your child abducted...William J. McGee is able to convey the intense pain one feels when a child is completely cut off from the parent. His anguish is palpable. The book is a page-turner.
